

- If you have used zoom before, you will get a prompt to Open Zoom. If you have never used it, the prompt asks you to Download Zoom.

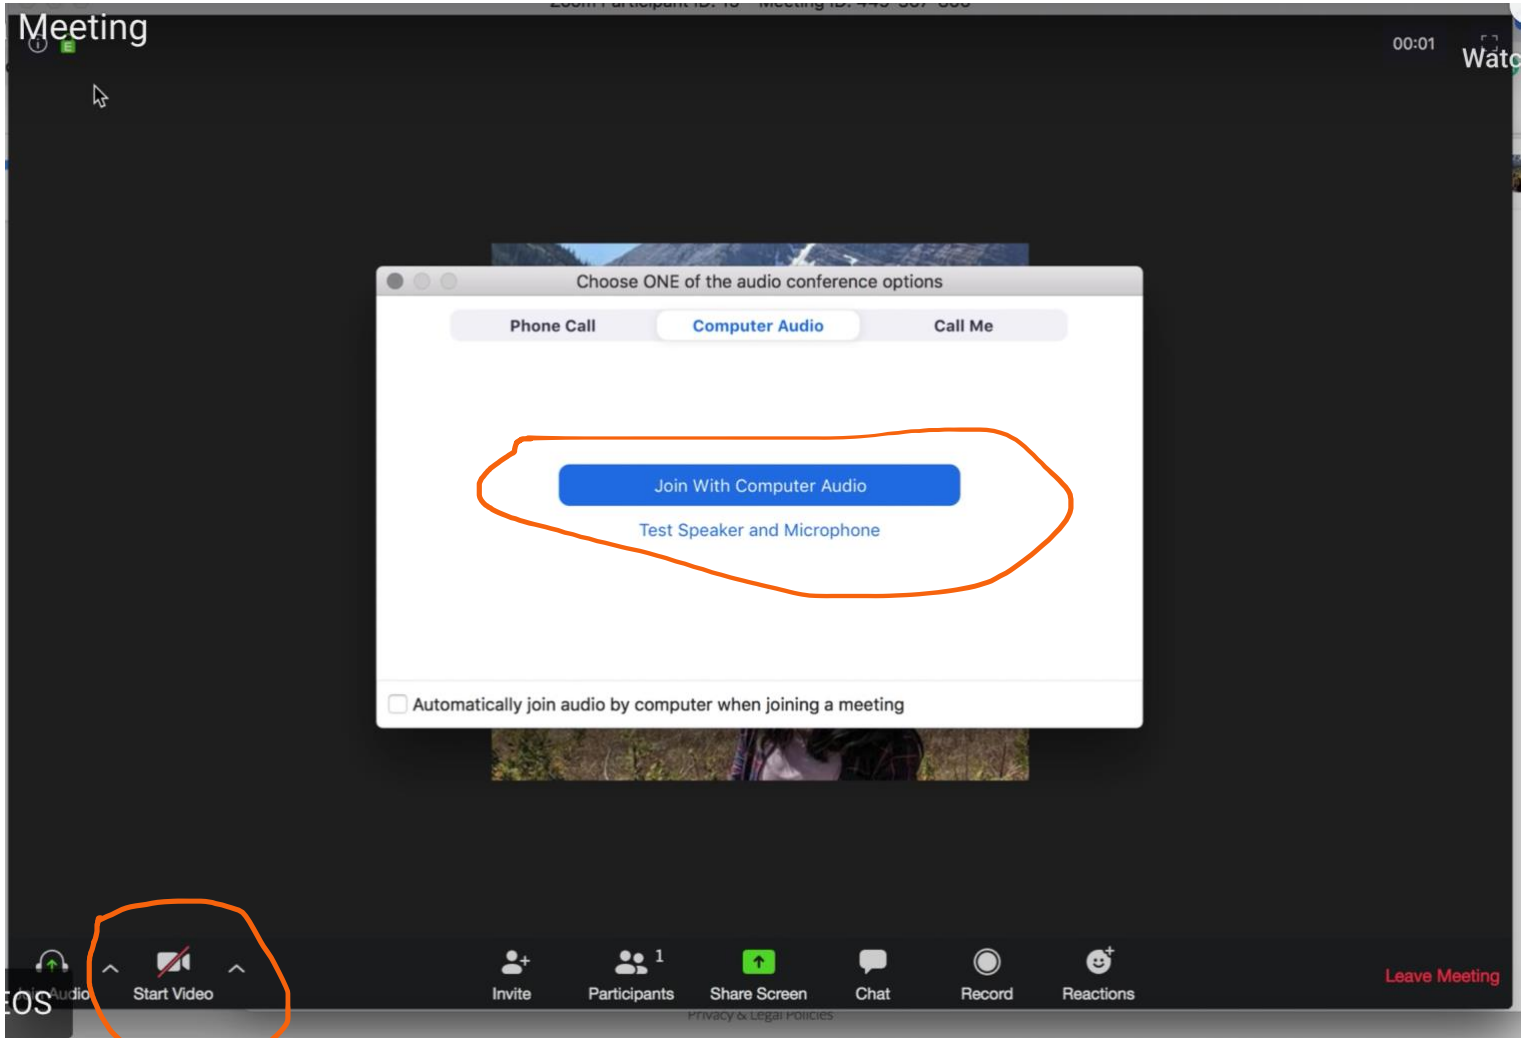

- Click on the option to download or open zoom

- Once you click Open Zoom you will see one of two things:
  - o If the meeting has not started yet, a “Waiting for the host to start this meeting” message will appear.

- If the meeting started, you will see the meeting room open. Choose an audio option and click on the Camera option to toggle it on so we can see you!

That's it!
